

BCM3243 - MULTIMEDIA DEVELOPMENT WORKSHOP
SEMESTER I 20242025

NAME: _____
ID: _____
SECTION: _____

APPLICATION NAME: _____

ASSIGNMENT 3

CO2: Develop multimedia application by involving necessary activities in project development process using various tools and techniques (CO2-P4: 25%)

CO	NO	Criteria	5	4	3	2	1	0	WEIGHT	SCORE	MARK
CO2	1	User Interface Development	All user interface are well developed following the storyboard design and suitable with the application requirements (user, type of application, content, etc)	In between	50% of the storyboard designs are developed and suitable with the application requirements	In between	Less than 10% of the storyboard designs are developed and not suitable with the application requirements		2		
	2	Development of Functions/Modules	All functions in the individual module are well developed with no errors.	In between	50% of the functions are well developed.	In between	Less than 10% of the functions are developed with errors		3		
	3	Application Deployment	All modules are successfully integrated and functioning as one(1) application and give impact on the basic look and feel	All modules integrate as one(1) application but only 70% successfully functioning	Only 50% of the modules are successfully integrated as one(1) application	Only 25% of the modules are successfully integrated as one(1) application	The application need to be accessed from the development tools		1		
	4	Overall Application Flow and Structure	All screens are connected with no error	In between	50% of the screens are connected with some errors	In between	Most of the screens are not connected and many errors		1		
	5	Application Rules	Well developed and functioning	In between	Developed but functioning with some errors (50%) on the application rules	In between	Not developed as per application rules written		1		
	6	Interactivity	Provide good interactivity between user and the application. - Fast response - Appropriate use of error handler/ messages to user	In between	Provide acceptable interactivity between user and the application. - Appropriate response time - Inappropriate use of error handler/messages to user	In between	Less interactivitywith no error handler or messages to user		1		
	7	Screen flow (how each screen related)	Clearly presented and all the screen is logically related	In between	Presented the screen flow but only 50% is understandable	In between	Did not show well how the screen flow from one scene to the other		1		
TOTAL MARKS (CO2)
